Office of Land Use Coordination
Washington

March 4, 1940.

MEMORANDUM NO. 64

MEMORANDUM TO FIELD FLOOD CONTROL COMMITTEES
(Through BAE, FS, and SCS)

Subject: Submission of Flood Control Estimates.

On February 7, 1939, an unnumbered Memorandum (subsequently identified as Memorandum No. 26) was issued which required that flood control estimates be submitted on March 31 and September 30 respectively covering (1) the ensuing three months period and (2) the six months period following the three months period.

The March 31 and September 30 estimates called for in the unnumbered Memorandum of February 7, 1939, will no longer be required, as Memorandum No. 44, dated July 26, 1939, covering the preparation of survey work outlines, specified the submission of estimates based on the work outline. Allotments are now being based on these latter estimates.

By June 15 estimates to serve as a basis for 1941 allotments for the surveys underway but not completed on June 30 next will be required as well as estimates by bureau regions, for preliminary examinations during the fiscal year 1941.

This Memorandum will be supplemented in a few weeks with detailed information for the preparation of the estimates to be submitted by June 15.

E. H. Wiecking

E. H. Wiecking,
Associate Land Use Coordinator,
In Charge, Flood Control Coordination.
